

Important License Activation Information:

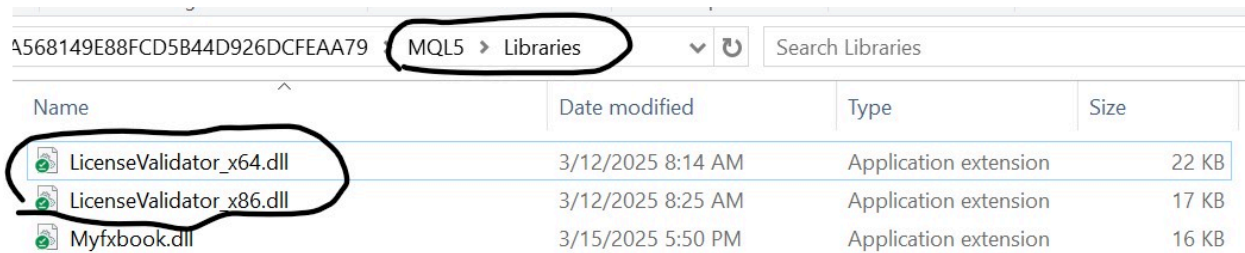

When you purchase a TickStack application, your license requires manual activation, which may take up to 24 hours. Once activated, you'll receive an email from support@tickstack.io containing login credentials for your user dashboard where you can manage your licenses. Please note that you cannot use the product until you receive this activation email.

TickStack Metatrader Application Installation Guide:

Step 1: Install License Validator Files

- Copy both "LicenseValidator_x64.dll" and "LicenseValidator_x86.dll" into your MT5 Libraries folder
- To locate the Libraries folder:
 1. Open your Metatrader terminal
 2. Click "File" → "Open Data Folder" in the top left corner
 3. Navigate to "MQL5" → "Libraries"

Note: If you own multiple TickStack applications, you only need to install these DLL files once, as all our applications use the same files to connect to our license server.

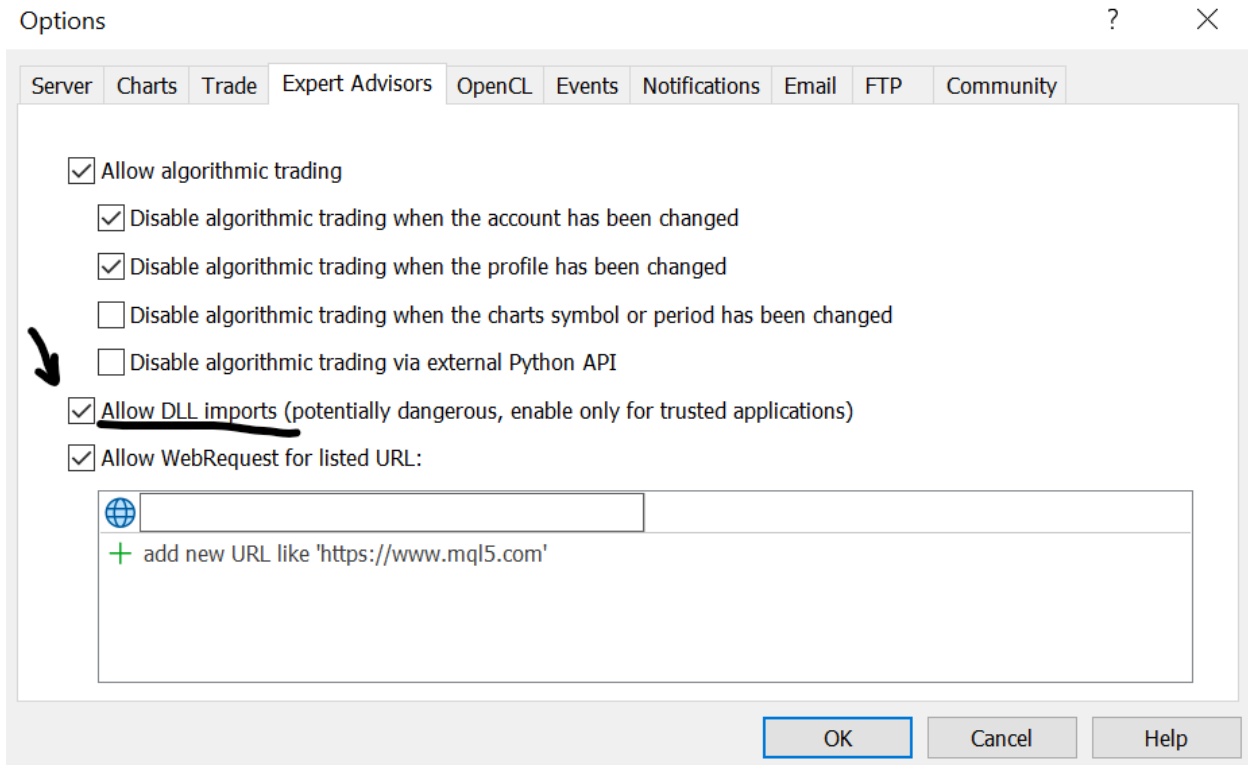

The screenshot shows the MT5 MQL5 Libraries folder. The breadcrumb path "MQL5 > Libraries" is circled in black. Below it, a table lists the files in the folder. The first two rows, "LicenseValidator_x64.dll" and "LicenseValidator_x86.dll", are circled in black. The third row is "Myfxbook.dll".

A568149E88FCD5B44D926DCFEAA79 MQL5 > Libraries				Search Libraries
Name	Date modified	Type	Size	
 LicenseValidator_x64.dll	3/12/2025 8:14 AM	Application extension	22 KB	
 LicenseValidator_x86.dll	3/12/2025 8:25 AM	Application extension	17 KB	
 Myfxbook.dll	3/15/2025 5:50 PM	Application extension	16 KB	

Step 2: Allow DLL imports

From your MT5 terminal, navigate to "Tools" -> "Options" and then click on the "Expert Advisors" tab. Then check the mark for "Allow DLL Imports"

Step 3: Install Application Files

- Copy the expert advisor (.ex5) or indicator file (.ex5) into the appropriate folder:
 1. Expert advisors go into the "Experts" folder
 2. Indicators go into the "Indicators" folder
- To locate these folders:
 1. Open your Metatrader terminal
 2. Click "File" → "Open Data Folder" in the top left corner
 3. Navigate to "MQL5" → "Experts" or "Indicators" as appropriate
- Restart your Metatrader Terminal
- Open the navigator and locate the application.
- Drag the application onto the chart you wish to use it on.

Step 4: Activate Your Application

- When you run the application, you'll be prompted to enter your credentials in the application menu inputs
- Enter your email address and license key (found in your purchase confirmation email)
- The program will run if all three conditions are valid: correct email, valid license key, and authorized account
- If any input is invalid, the program will terminate

Variable	Value
License Settings	
ab License Key	YOUR_LICENSE_KEY
ab User Email	youremail@email.com

Note: Each license allows usage on up to two accounts simultaneously. To change account numbers, manage your license keys through our user portal: <https://license.tickstack.io/portal/>

Your purchase confirmation email contains your portal password. If you own multiple TickStack products, you can manage all license keys from your personal dashboard.
